Dr. Joshua Lederberg  
Stanford University  
Stanford, California

Dear Dr. Lederberg:

You may know that Westinghouse intends to plant a 5,000 year time capsule now being exhibited at the New York World's Fair. We are considering including an account of the following two subjects: (1) exobiology, (2) the problem considering possible biological contamination of the planets. We are wondering whether you will be kind enough to suggest several authoritative and complete references on the subject so that we may include some reprints of these articles in the capsule. We would also appreciate receiving some of your own articles on the subjects.

Thank you very kindly for your attention.

Sincerely,

K. H. Sun, Manager  
Radiation and Nucleonics Laboratory

Westinghouse
